

# STEPHANE LUBENDO

Full Stack Web Developer | 778-829-9690 | [stephane.lubendo@gmail.com](mailto:stephane.lubendo@gmail.com) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

## Skills

**Languages & Technologies:** TypeScript, React, JavaScript, Next.js, MySQL, Postgres, C#, ASP.Net, PHP, Laravel, WordPress, EJS, Express, Node.js, Rest Api, Tailwind, HTML, CSS, Git

## WORK EXPERIENCE

**Eye Photo System, Full Stack Web Developer** **Jan 2023 – Present**

- Developed a **Express** server using **Typescript** and connected it to a responsive **React** frontend using **API** calls to Create, Read, Update, Delete data end points.
- Design and implemented a **MySQL** database utilizing the new json data type, to make for efficient and custom data retrieval.
- Utilized props in **React** to manage state between different components.

**Evolve Creative Solution, Intern Web Developer** **Dec 2023 – Present**

- Created web apps using **HTML, PHP** and **WordPress**, resulting in customer facing websites.
- Collaborated with team members to brainstorm and implement innovative design, enhancing user experience and engagement.

## PROJECT EXPERIENCE

**[XYTweet](#) Twitter Clone** **Mar 2024**

- Built a *serverless* twitter clone using **Next.js** and **Typescript** for the frontend and backend.
- Utilize props to manage state in between components in Next.js. Also used built in server side endpoints to call **PostgreSQL** database for data manipulation.

**[TaskIT](#) Task manager** **Mar 2024**

- Built a task manager using an **Express** backend and **EJS** as the frontend templating language.
- Created a **MySQL** database to Create, Read, Update and Delete tasks.
- Implemented frontend designs for an intuitive UI, that connects to the backend.

**MarkITDown Markdown text editor** **Jan 2024**

- Redesign a text editor(Evernote) using **React, TypeScript** and **Tailwind CSS**.
- Integrated database management operations using **PostgreSQL** and **Drizzle** as an ORM. Used API calls to an express backend to Create, Read, Update, Delete data.

**Prospective AI AI Driven scholarship finder** **Dec 2023**

- Collaborated in a team to create designs and wire frame using **Typescript Tailwind CSS** for an AI scholarship finder.
- Prospective utilizes AI to scrape the web using **Serp API**, to find custom scholarship based on the user.
- Created a complex **SQL** database, used to store and organize user data for efficient access.

**ChatNet Collaborative AI Chat app** **May 2023**

- Worked on a team that utilized **Javascript, HTML EJS** and **Socket.io** to implement designs into a tangible web chat app.
- Integrated a **Open AI** into the chat app as a copilot.
- Utilized **GitHub** using pull request different branches to *avoid* and solve merge conflicts.

## EDUCATION

**Full-Stack Web Development Diploma** **Sep 2022 – Apr 2024**

*British Columbia Institute of Technology (BCIT)*

- **Set Representative** for my class in meetings with instructors, the Student Association, and the School of Computing program head to improve communication and feedback.
